

Business Dashboard

Present targeted sales pitches – every time.

Looking for a simple yet effective way to present key facts and figures about your business to potential customers, partners, media and investors?

You just found it.

Business Dashboard is a 'business gateway' that presents all the necessary information your potential customers need to know about your business but may not have time to find.

The efficient, eye-catching dashboard format gives them complete control over what they view – based on what you want them to see.

By simply sending a link to your Business Dashboard, potential customers who click the featured hyperlinks will be taken immediately to the webpages on your site that are relevant to them **and that will encourage them to buy.**

That means you'll be able to present targeted sales pitches – every time.

What types of information can be included in a Business Dashboard?

- Business introduction/overview
- Product/service information
- Work and product samples
- Profiles of key executives and staff
- Advertising and special promotions
- Case studies and key achievements
- Company history
- Client list, price lists, etc.
- CSR/IR information, and more.

To make viewing of your site even more efficient, different Business Dashboard versions can be created for different users: customers, investors, partners, media, and more.

For even greater impact, combine a dashboard with a [Business Bio](#) or [corporate profile](#).

Business Dashboards pull together and feature everything you want a particular type of customer to see – on 1 eye-catching page
