

Gardening and Urban Farming Services

Tools, information and services to plant, grow and sow near-organic food in the city

Introduction

One of the best things we can do for our health is to grow our own food and eat it fresh. That's why our key focus is to **equip customers with the necessary skills to grow food** – in the city – using planet-friendly methods and no added chemicals.

Benefits

- ✓ Learn how to grow delicious, near-organic food
- ✓ Reduce intake of agricultural chemicals
- ✓ Slash food miles | Reduce pollution
- ✓ Boost food independence and increase survival chances if a major disaster strikes
- ✓ Customers do not need to own land to grow
- ✓ Fully customizable – Large range of planter boxes, seeds and growing solutions available.

Food growing kits

All kits contain everything you need to start growing food and living a more sustainable life.

Urban Farming Starter Pack	A complete food growing kit comprising up to 10 planter boxes, soil, seeds, etc. For rooftops, decks and other large spaces. >> Info
GroBrick kit	Small "open-and-grow" kits – ideal for the home or office on desks, windowsills, tables, etc. >> Info
GroRacks	Larger growing system to enable you to harvest more food at the home or office. For verandahs, decks, indoors, etc. >> Info (see p2)

Gardening services

We provide a full range of seed-to-plate gardening services including:

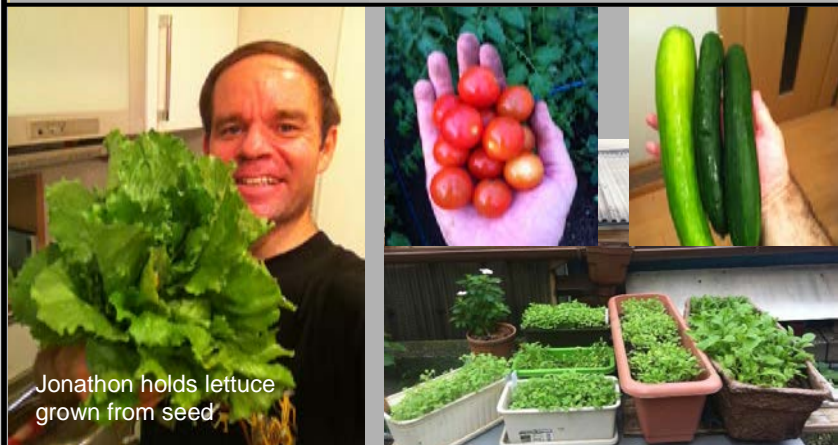

- Equipment & purchasing advice
- **Garden installation & advice**
- Soil preparation & seed sowing
- Plant maintenance, harvesting advice
- Gardening demos & event planning.

A GroBrick growing kit

Our **food growing kits** enable food to be grown on virtually any sunlit area: rooftops, verandahs, decks, driveways, patios, car parks, etc. And if you don't know how to grow food, we provide all necessary "hands-on" instruction, ongoing support, and a highly practical education program that will turn customers into urban gardeners within weeks.
