

Garden Building Basics

In this highly practical lesson, urban farming consultant Jon Walsh showed Grade 4 students how to sow seeds and transplant seedlings – the core basics of growing food. Students then built a flower pot fence garden, all within 40 minutes – impressive!

Jon explaining to students what they will do during the lesson.

Students discussing the basics of sowing seeds and transplanting seedlings.

Seeds sown!

Students try their hand at transplanting herbs into flower pots.

Jon explaining the importance of soil depth to students.
