

Magical Flower Trail

Lesson Report

After urban farming consultant Jon Walsh successfully convinced Fiona's Grade 2 pupils that he had been "too busy" to plan their urban farming class, students found 2 lone flowers on the rooftop. This sparked a search for more, and after following a trail of flowers down 4 flights of stairs and out into the main courtyard, they found where the mysterious flower trail had been leading them – to build a 20-pot flower garden on the front fence!

Students in "controlled chaos" mode filling flower pots.

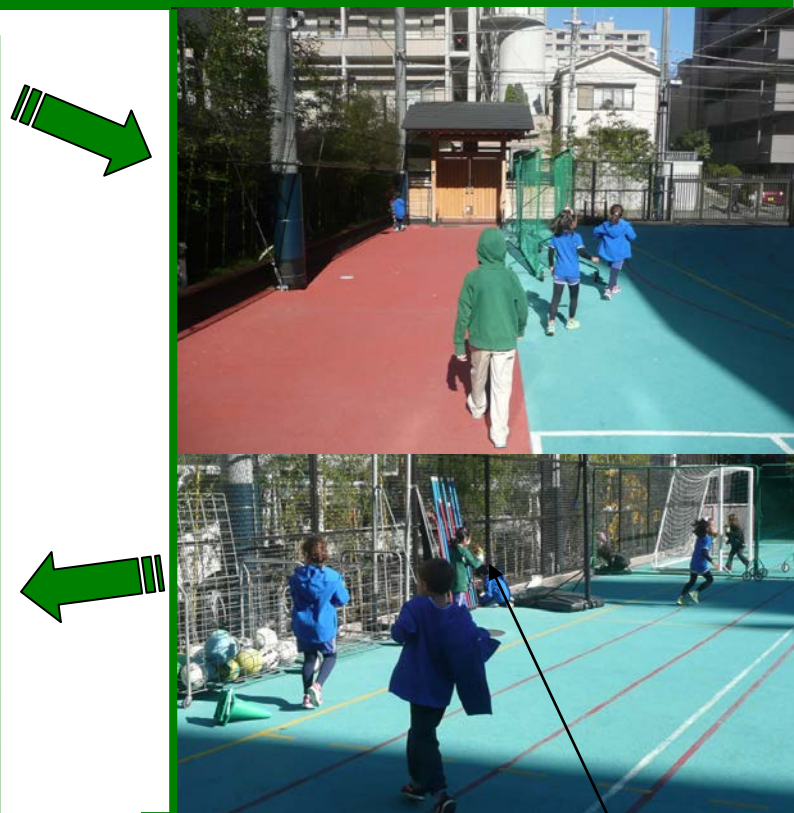

What did students learn?

- How to build a fence garden (vertical gardening)
- That beautiful gardens and healthy vegetables can encourage people to talk and make friends.

- Urban food production & training
- Garden installation & maintenance
- Gardening demonstrations.

E-mail: info@businessgrow.net

And they're off searching for flowers!

Finished! Students show off their new fence garden.
